

FinBrain Demo Seed Verification

Live post-reset inventory of the remote Supabase demo database

VERIFIED SNAPSHOT

Generated 2026-08-21 11:26:06 UTC. The database passed 13/13 demo readiness checks, schema/RLS validation, privacy checks, and audit-chain verification.

Purpose and interpretation

This report lists records actually present immediately after the authorized reset and reseed. It is a verification snapshot, not merely a description of intended fixtures. Database-generated IDs and timestamps may differ on a future reseed.

Important boundary

The seeded Telegram account is deliberately synthetic and non-deliverable. It exercises onboarding, customer linking, drafting, approval, and reminder planning without messaging a real person. A real user must complete /start before live Telegram delivery. Connector heartbeats, Telegram update receipts, and email sync cursors are intentionally empty while services remain stopped.

Synthetic identities intentionally inserted

Telegram customer	Demo Telegram Customer	Completed onboarding and reminder workflow
Telegram user/chat ID	999000000001	Persistent placeholder only; cannot receive messages
Telegram Gmail	finbrain.demo.invalid@gmail.com	Synthetic onboarding email
Telegram phone	+601100000001	Synthetic onboarding phone
Email customer	Luma Retail Sdn Bhd	Email/customer/e-invoice workflow
Luma email	aisha.karim@luma-retail.example	Reserved .example domain; non-deliverable

1. Database inventory

All public tables are shown, including preserved authorization/schema tables and intentionally empty runtime tables.

5. Telegram onboarding and reminder policy

1	Telegram contact - D986EE	completed	telegram-user-*****	2026-08-21 11:15:12.990772+00:00	2026-08-21 11:15:22.030046+00:00

Tenant outreach policy

True	1	30	3	True	1

Governance result

The overdue Telegram reminder is generated into pending approval. Finance Operations may draft and submit it, but owner_director approval remains required before delivery.

6. Governed outreach and reply fixtures

Luma Retail Sdn Bhd email	draft manual	Draft customer check-in	Please review this editable response before submitting it for approval.	invoice: - scheduled: - sent: - replied: - attempts: 0
Luma Retail Sdn Bhd email	pending_approval manual	Delivery reconciliation follow-up	Please confirm the delivery variance so ORG_b49ae1e908 can reconcile it.	invoice: - scheduled: - sent: - replied: - attempts: 0

8. Process recommendations

Demo proposed process improvement [proposed]

Category: demo_followup | Priority: medium | Confidence: 0.9 | Evidence rows: 3 | Sources: ["email"]

Problem: Protected records show repeatable follow-up work.

Recommendation: Use a governed owner queue and measurable resolution target.

Expected benefit: Faster, auditable resolution. | Owner: Finance Operations | Metric: Reduce unresolved follow-ups by 50% in 30 days.

Demo implemented process improvement [implemented]

Category: demo_followup | Priority: medium | Confidence: 0.9 | Evidence rows: 3 | Sources: ["email"]

Problem: Protected records show repeatable follow-up work.

Recommendation: Use a governed owner queue and measurable resolution target.

Expected benefit: Faster, auditable resolution. | Owner: Finance Operations | Metric: Reduce unresolved follow-ups by 50% in 30 days.

Recorded recommendation decisions

2	approved	owner_director	demo-session-seed-v1	2026-08-21 11:16:37.319725+00:00
2	implemented	owner_director	demo-session-seed-v1	2026-08-21 11:16:37.319725+00:00

9. Persistent conversation evidence

Conversation demo-session-customer-intelligence-v1 - turn 1

Status: active | Role: owner_director | Intent: source_listing | Mode: sql-first | Sources: ["email"]

Question: Show the protected demo sources.

Answer: The cited records demonstrate cross-source evidence persistence.

Vault and disclosure controls

Encrypted vault rows	94	Sensitive fixture values encrypted at rest
Safe registry rows	94	Matches vault row count
Active vault keys	1	One active generation
Incomplete rotations	0	No unfinished key rotation
Disclosure audit events	0	Zero: report did not detokenize vault values

Verification conclusion

The post-reset database contains complete synthetic demo coverage while retaining production-safe ingestion and governance behavior. Live integrations can be started later; doing so will create new operational receipts, heartbeats, sync cursors, and ingested records beyond this snapshot.
